

Video Game Builders™

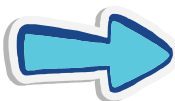

For new and continuing students in grades K - 6

Wednesdays from 3:35 PM to 4:35 PM (11 weeks)
November 29, 2017 to February 21, 2018

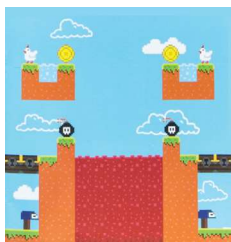

Video Game Builders™ combines the physical world with the virtual world to empower children to create their own video games! Using physical building blocks arranged on a special game board, children work collaboratively to create worlds and characters. Children then transfer images of their creations into special video game creation software, where the images are converted into virtual worlds and characters! The result is a customized video game to play and share!

The physical world...

becomes the virtual world!

Let's build, create, and play video games!

New kid-friendly themes and activities every session!
Bring your imagination to life!
Join us for Video Game Builders!
