

New and Continuing Students Welcome!

Learn coding with the world's leading programming language for kids!

Scratch is the perfect place to start creating and understanding the power of code, and Power Up's teachers are experts in guiding your child on that journey.

In this class, we will:

- Make animations and video games that really work!
- Learn coding concepts like events, loops and conditionals to build interactive projects.
- Customize projects with our own designs or images of favorite characters.

At the end of the class, your child can continue using the free Scratch website to code and create at home.

- ⚡ Small class size for personal attention
- ⚡ Teachers who are coders too
- ⚡ Build working projects from Day One
- ⚡ Learn logic & problem solving skills
- ⚡ Express creativity & personal ideas

Coding with Scratch at Coonley

Grades: 2nd, 3rd
